Mokasol has actually been espoused to the coffee cause since far off 1950. A love match constantly nurtured by the passion dedicated to preserving and spreading the "magic beans" cult and the infinite care that their preparation requires. The research operations for the choicest raw material selection and the implementation of the most accurate methods for the roasting and packaging processes, work to ensure the preservation of the thousand and one aromas that make up the unique and inimitable taste of Italian-styled espresso coffee. The accuracy of the care granted by artisan skills for the satisfaction of coffee connoisseur passions. These are, we feel expectedly, the reasons why our production is most heartily appreciated.

THE COFFEE BLENDS THAT MOST APTLY PORTRAY OUR COMMITMENT:

ARABICA BLEND. Its subtly fine, all enveloping taste has earned this blend the "Italian Quality Espresso" certification seal by the Italian G.T.T., thus fully warranting the product for international acknowledgement.

GRANBAR BLEND. This renown Mokasol blend, composed of an artful blend of excellent Arabica and extraordinary, highly select Robusta beans has been fully satisfying our customers for over half a century and counting.

Due to their individual uniqueness yet with creamy, full bodied tastes akin to all, our specialty coffee blends successfully deliver on fulfilling the expectations and demands of each single one of our customers and coffee lover fans alike.

ORGANICALLY GROWN BLEND. Our belief in organically grown products has resulted in the perfecting of a blend of completely organically grown and certified organic coffee versions, custom blended for restaurants or bars offering totally organic menus or for increased product option qualification by specialty coffee bars.

COFFEE PODS. Highly select blends providing unique bar-style flavoured coffee pods for the automatic coffee dispenser and vending markets. Apart from the traditional bar and decaf blend pods, we have recently added a range of aromatised coffee blends, with chocolate, vanilla, amaretto, sambuca anisette, nut and whisky flavouring, for creative sale diversification from the traditional cup of coffee.
